

Battery Chargers

Battery Solutions

- Automatic cutoff then true float
- Switch-Mode technology reduces size
- Higher efficiency
- Intelligent charging cycle allows for safe charging
- Multi-color charging status LED

C&C Power's Automatic Switch-Mode Battery Chargers are suitable for charging Gel, Sealed, and Wet Lead Acid Batteries. These chargers can charge batteries with voltage as low as 0.5 volts.

With microchip technology and automatic current limiting capabilities, these are some of the most versatile and compact chargers available. Chargers are available from 12-48 volts.
