

Cube Rack

Battery Solutions

- Units stack up to four racks high
- Compact design
- Welded steel construction
- Optional disconnect box
- Black powder coat finish

C&C Power's Cube Rack provides an alternative to using valuable relay rack space. Each Cube Rack is 23 inches tall and can be stacked up to four racks high for reduced footprint.

Optional disconnect or fused disconnect boxes are available. Custom DC power cables are also available to meet specific requirements. Cube Racks may be ordered without batteries to allow for future expansion. Inter-unit cabling is provided for easy addition of battery strings.
