

HD-Series Battery Trays

Battery Solutions

- 650 pound capacity
- Designed for front access batteries
- Welded heavy gauge steel construction
- Adjustable from six to eight rack units
- 23" rack configuration
- Restraining brackets to hold batteries
- Black powder coat finish

The HD-Series 23 Inch Battery Tray provides a compact relay rack system designed for front termination VRLA batteries. The overall height is adjustable from six to eight rack units and no clearance is needed between shelves for optimal use of rack space. Several trays may be stacked and connected in parallel for increased battery reserve time.

A removable front plate allows for ease of installation. The batteries can be slid in and out without the need to be lifted over a lip. HD-Series Trays are available with power cables with 2 pole quick disconnects for isolating individual strings during system maintenance.

Part Number Configuration

91302 - 20 B 1
1 2 3 4

1. HD-Series Battery Tray Base Model Number

91302 = 23" Tray

2. Cable Size

02 = #2
04 = #4
20 = 2/0
40 = 4/0

3. Lug Clearance Hole Size

A = #10
B = 1/4"
C = 5/16"

4. Strings per Tray

1 = One String
2 = Two Strings

*Note: Use -0000 for empty tray configurations
