

Maintenance Bypass Breaker Cabinets

UPS Bypass Panel Series

- Multiple system configurations
- Two or three breaker design
- Floor and wall mount options
- Four cabinet sizes available
- UL 1778 listed and CSA certified

C&C Power offers Maintenance Bypass Breaker Cabinets available in multiple configurations. The MBBC allows the end user to safely isolate the UPS from utility power and from the load to perform regular service and maintenance. All of this is done while still maintaining power to your critical load.

The MBBC breakers are rated at 600 VAC. All 208 VAC systems are braced for 100,000 AIC and all 480 VAC systems are braced for 60,000 AIC. Mechanical lugs are used for both input and output terminations. Systems are available in 40-1,200 amp configurations with two or three breaker designs and 208 or 480 VAC. Multiple Kirk Key configurations are also available.

Available cabinet sizes include:

- Cabinet Size 1: 24"W x 12"D x 57"H
- Cabinet Size 2: 24"W x 12"D x 73"H
- Cabinet Size 3: 36"W x 12"D x 73"H
- Cabinet Size 4: 36"W x 12"D x 90"H
