

Reserve Power Unit

Battery Solutions

- Multiple rack configurations
- Compact design
- Quick connectors
- Battery disconnect breaker
- Black powder coat finish

C&C Power's Reserve Power Unit provides backup power in the smallest possible package. The RPU uses only 2RU of space in a 19" or 23" rack. The Reserve Power Unit can be installed in parallel to achieve higher amp hour capacities.

The optional Vertical Mounting Bracket allows for installation to the back of cabinets without consuming any valuable rack space.
