C&C Power's 90888 Wall Mount Maintenance Bypass Breaker Panel is our *most economical option for low AIC applications*. It's available in multiple configurations and allows the end user to safely isolate the UPS from utility power and from the load to perform regular service and maintenance. The MBBC contains three Cutler Hammer Series C circuit breakers that are protected by an interlock plate system that comes standard on every configuration.

Our 90888 wall mount bypass panel is available at 10k AIC for 208V 3-phase applications. It's also available in a 120/240 VAC single phase configuration.
