

DC Power Systems

By C&C Power

FEATURES:

- ▶ 10 - 10,000+ Amp DC Plants
- ▶ 2 week deliveries or less on most systems
- ▶ Hundreds of rectifiers in stock to facilitate quick deliveries
- ▶ Fuse & breaker panels in stock (GMT & TPA)
- ▶ Patented auto battery testing
- ▶ SNMP TCP/IP monitoring and control

C&CPower manufactures a large assortment of DC power products including both large and compact telecom power systems, fuse and breaker distribution panels, battery systems, rectifiers, relay racks, batteries, cable, and other system components.

C&C Power's large DC systems are ideal for central office, telecom hotels, and other applications requiring 10 to 10,000 plus amps of current. Our large DC systems modular designs allow our customers to build for their requirements today while easily being able to expand in the future.
