

RSAP TOUCH

Multiple UPS Remote Monitor

FEATURES:

- ▶ 8" 256-color touchscreen
- ▶ Monitor as many as eight UPS systems at once
- ▶ Visual indication with audible alarm
- ▶ Universal AC input
- ▶ ETL Listed to UL standards and CSA certified

C&C Power's Remote Status Alarm Panel Touch (RSAP Touch) is used to remotely monitor the alarm condition and real time state of multiple UPS on one screen. The RSAP Touch is wall mounted and can be located up to 1,000 feet from the UPS. The panel uses a color touchscreen to visually display the monitored UPS input status, the output that is being used and any UPS fault conditions. The RSAP Touch also has an audible alarm to warn of UPS fault conditions and an event system log with time and date history.

The RSAP Touch power supply features a universal AC input (90 ~ 264VAC). The 8" color touch screen displays the current state of 1 to 8 UPS systems on the main screen. Selecting a UPS will show a detailed view of the UPS where the audible alarm can be silenced.

RSAP TOUCH VISUAL INDICATORS:

- ▶ UPS AC input
- ▶ UPS charger/rectifier
- ▶ UPS system batteries
- ▶ UPS inverter
- ▶ UPS output
- ▶ Load on bypass
- ▶ UPS fault
- ▶ UPS overload
- ▶ UPS input failure
- ▶ UPS system battery low voltage
