

Custom Built Skids

Battery Cabinet Solution

FEATURES:

- ▶ Designed / Fabricated to meet customer's needs
- ▶ Multiple battery cabinet skid
- ▶ Welded, heavy gauge steel construction
- ▶ Battery Cabinets pre-wired to landing cabinet
- ▶ Factory tested and certified
- ▶ Oversized heavy-duty hoist rings
- ▶ All compression lug landings
- ▶ Seismically rated
- ▶ Optional system load testing

BENEFITS:

- ▶ Faster equipment deployment on-site
- ▶ Faster installation on-site
- ▶ Reduce on-site labor costs

C&C Power offers custom-built skids for easy shipping and installation in any critical facility. We are driven to improving the logistical efficiency of each customer order.

Custom engineered skids are made of a welded heavy-gauge steel construction to withstand the weight of multiple battery cabinets and battery paralleling solutions. Heavy-duty hoist rings are strategically placed on the skid to lift equipment onto a transportation unit and into the desired location.

Each skid is built with the customer in mind. C&C Power engineers fabricate and construct with all consideration on facility requirements and product specifications.

Battery cabinets are pre-wired to landing cabinet and tested before leaving the factory floor. Each unit is certified and Seismically rated.
